CONFIDENTIAL

Executive Summary

TOTAL PACKAGES

21,032

TOTAL INVOICED

\$132,467

TOTAL LCC SAVINGS

\$6,945

SAVINGS RATE

5.2%

What is Least Cost Carrier?

Implentio's Least Cost Carrier (LCC) tool validates the cost efficiency of every shipment by identifying whether packages were routed to the lowest-cost carrier option among those with comparable service levels.

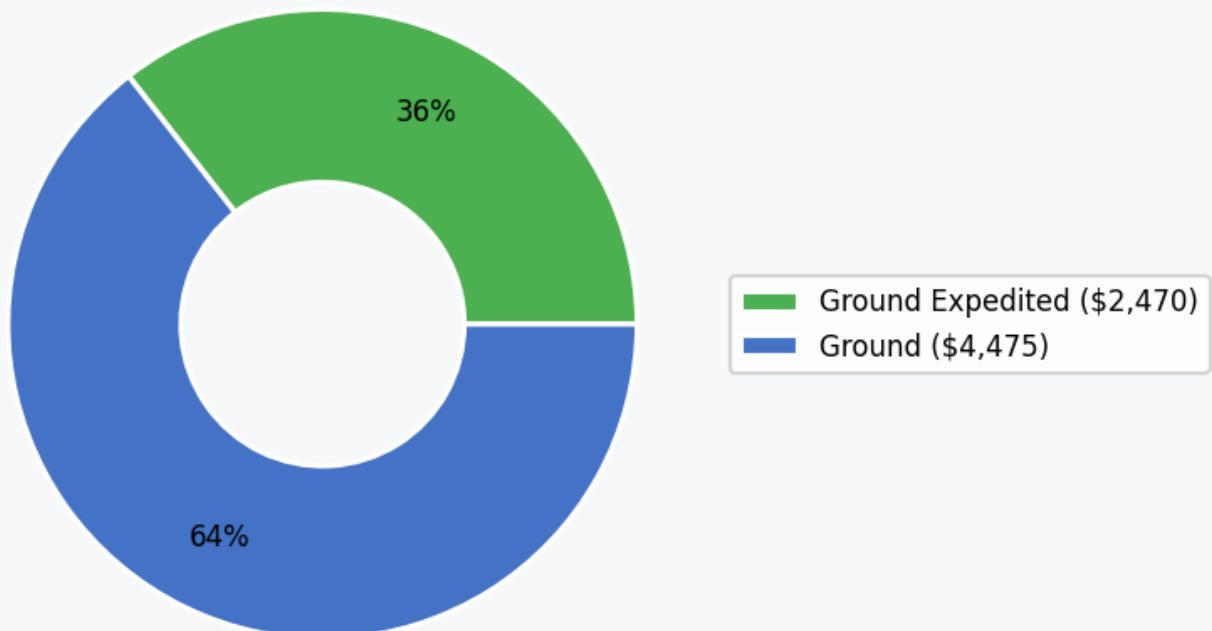

How it works:

- Every package is repriced across all available rate cards and compared against the actual carrier and service level used
- Analysis includes all relevant surcharges — fuel, residential, DAS/EDAS, peak, and additional handling

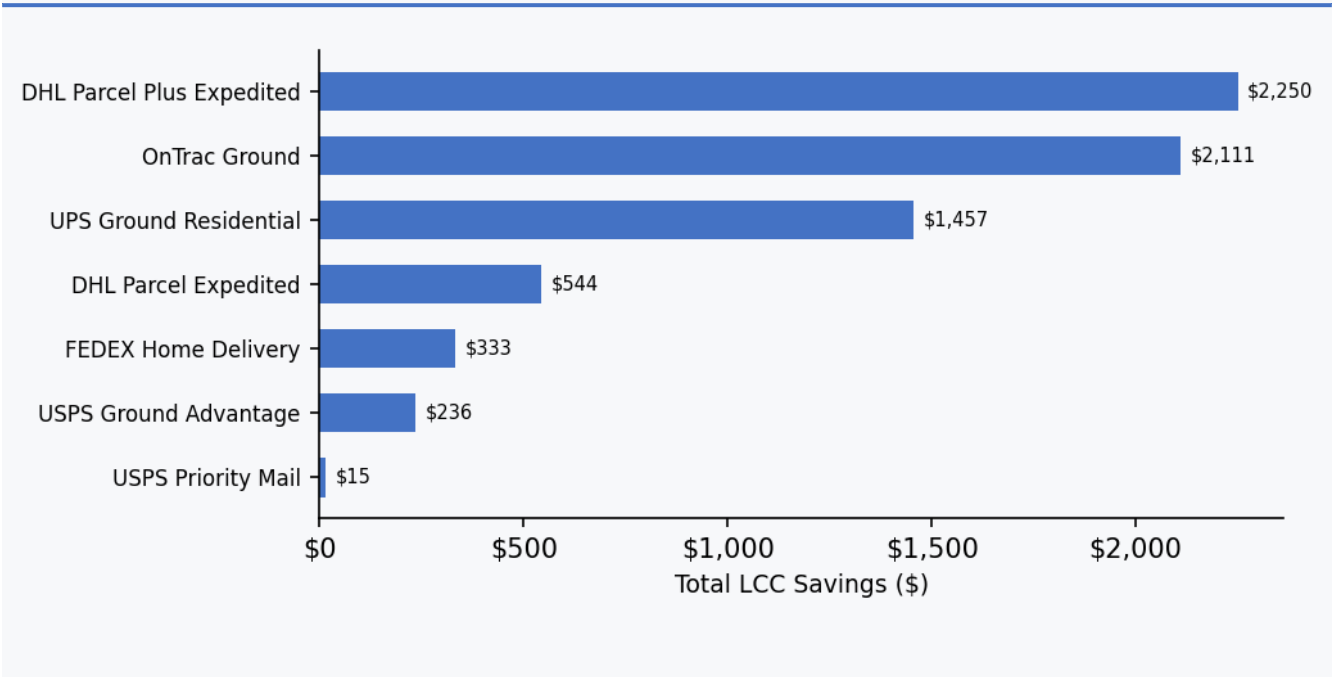

What to do with the results:

Since 3PLs are responsible for routing decisions, your 3PL may owe a refund for any shipments where you were overcharged. Beyond recovering past costs, use these findings to correct routing logic going forward and reduce future spend. Reach out to Implentio with any questions.
